Clinical Immersion

O.T.

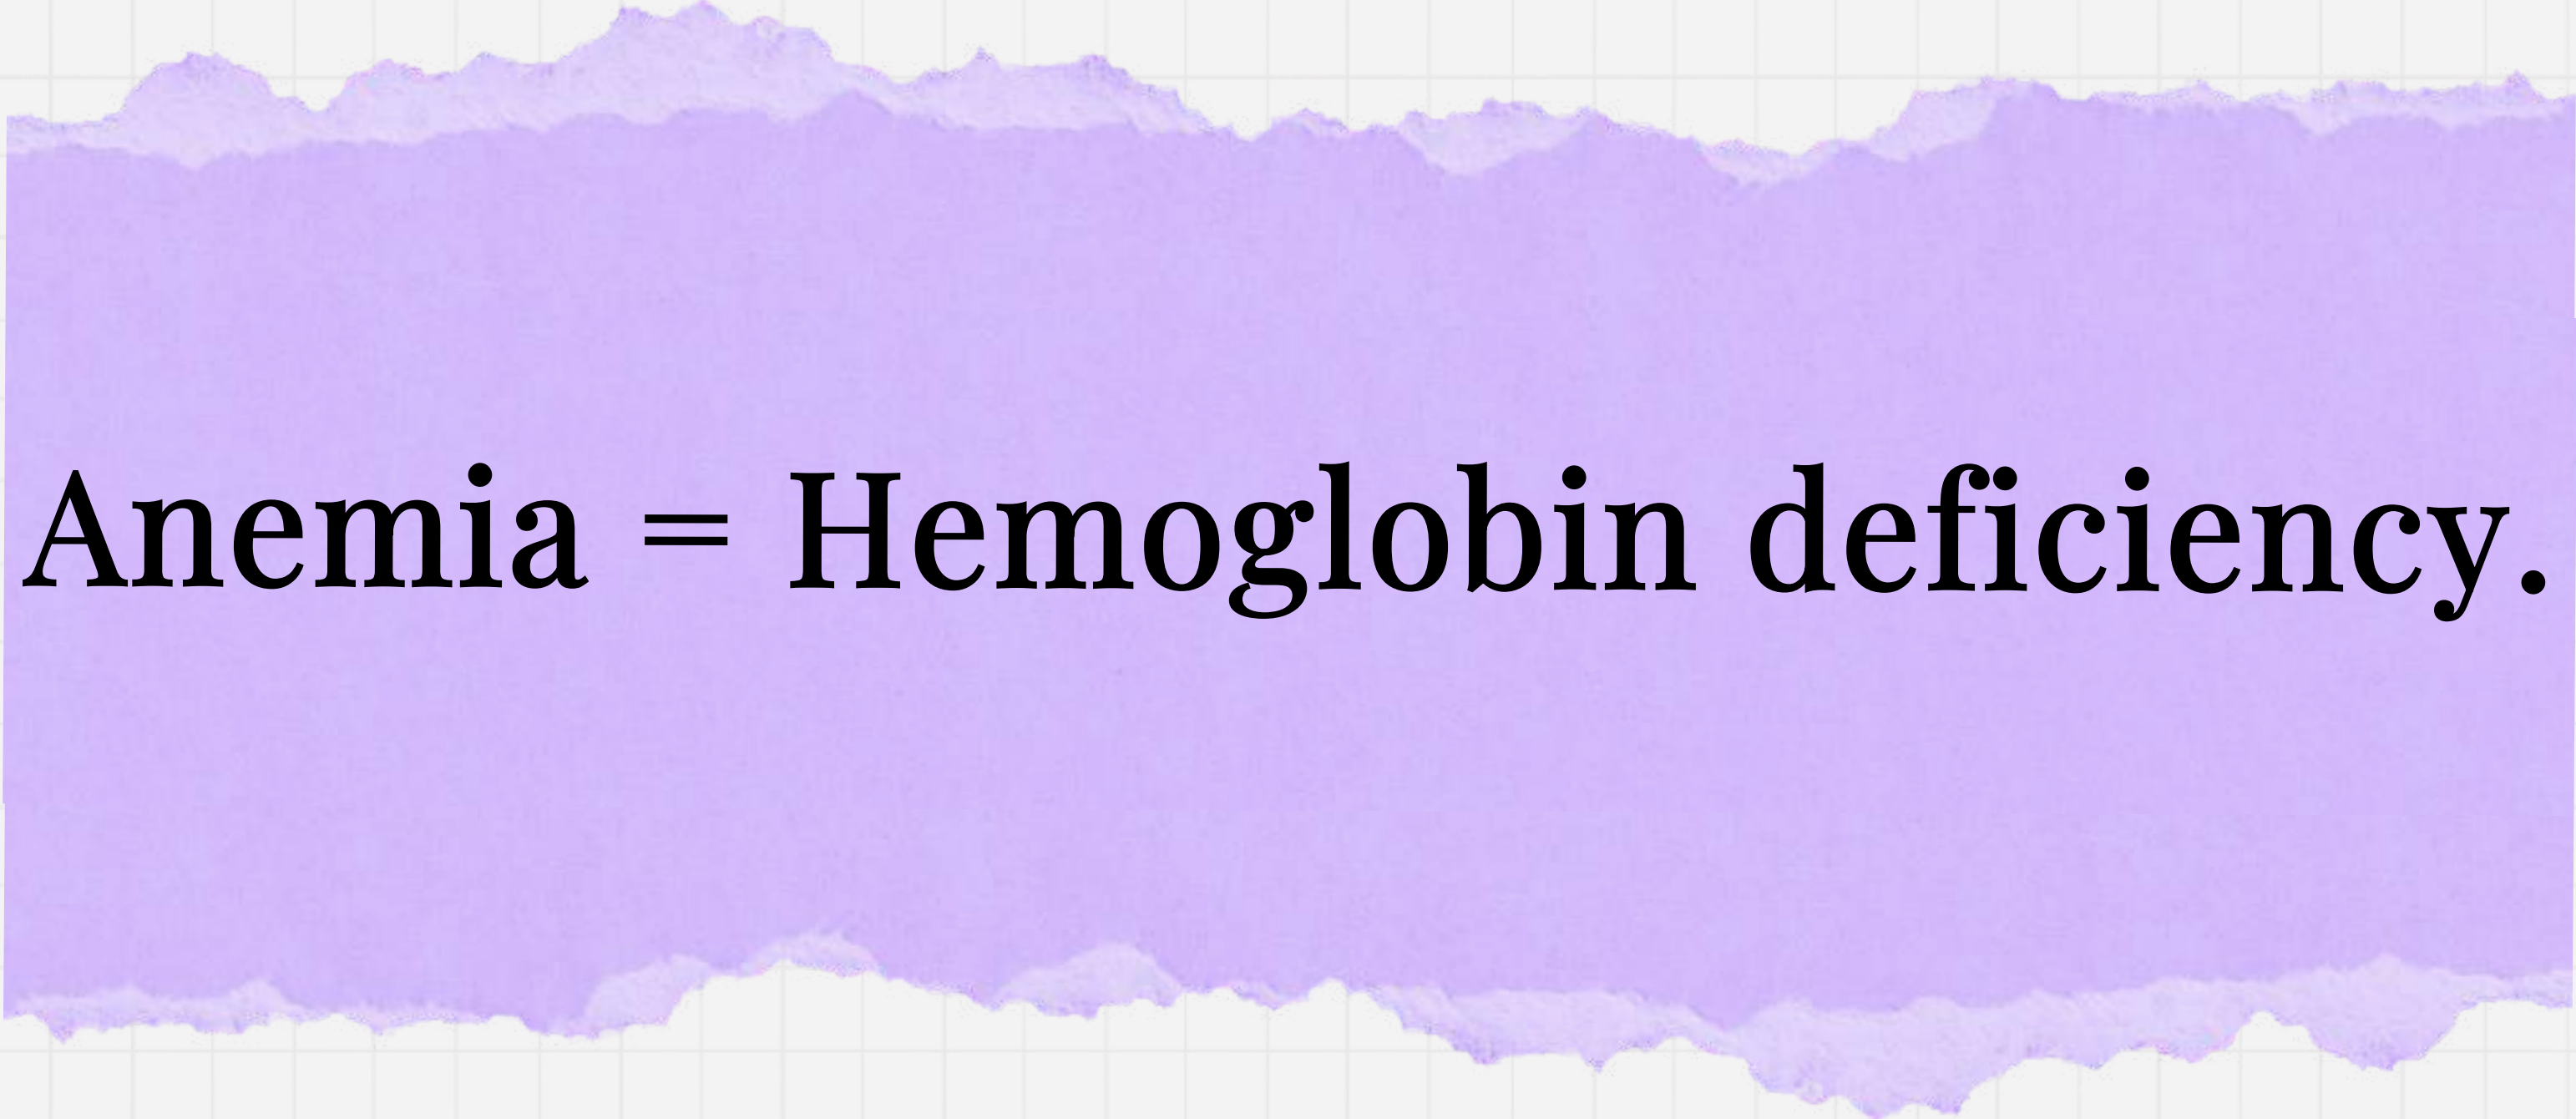

Anaemia- A Silent Burden

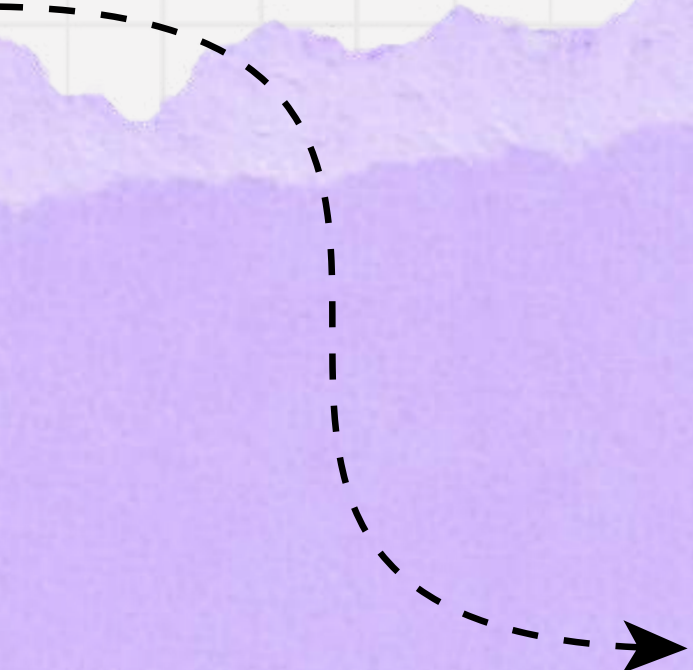

According to NFHS 2019–2021:

1. Children – 67%
2. Women – 57.1%
3. Adolescent girls – 59.1%
4. Adolescent boys – 31.1%

Needles and Hospitals
don't scale beyond a
point

Anemia = Hemoglobin deficiency.

Solution

A novel device that is:

non-
invasive

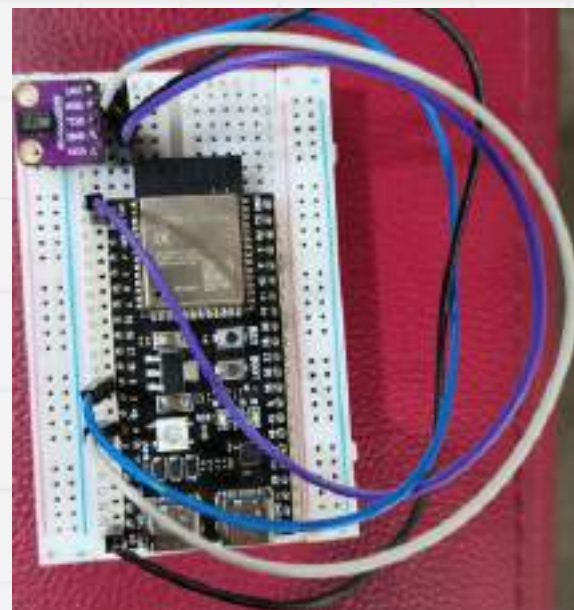

less time
consuming

Accurate

Current Status

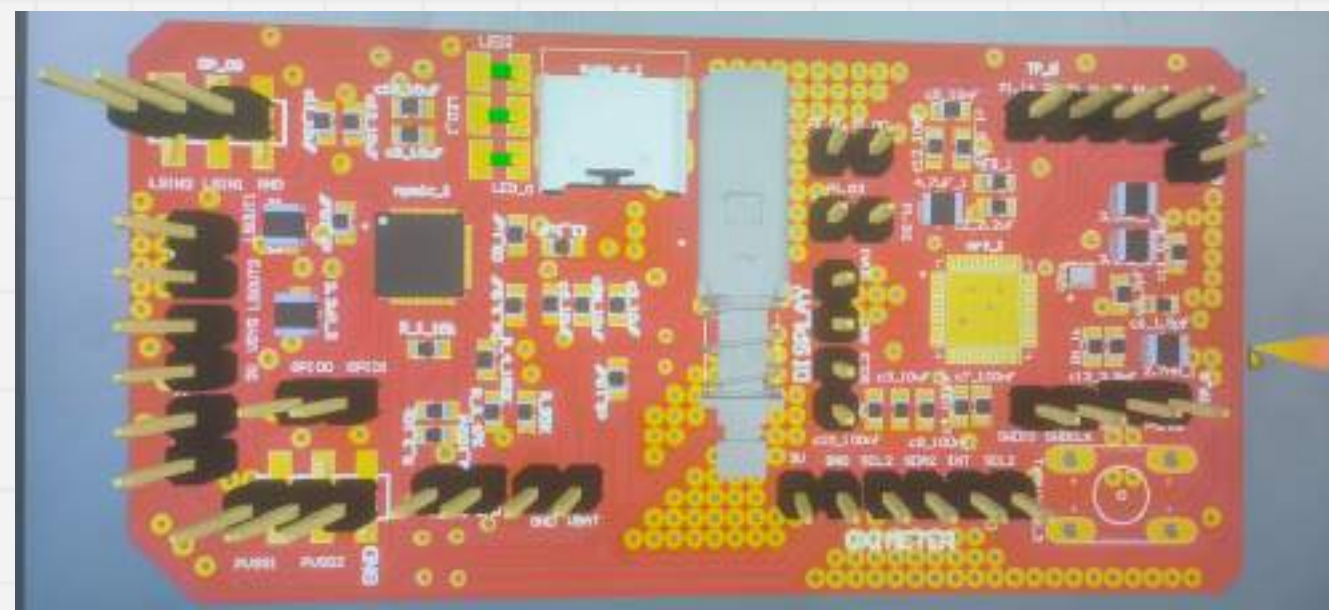

* Proof of Concept

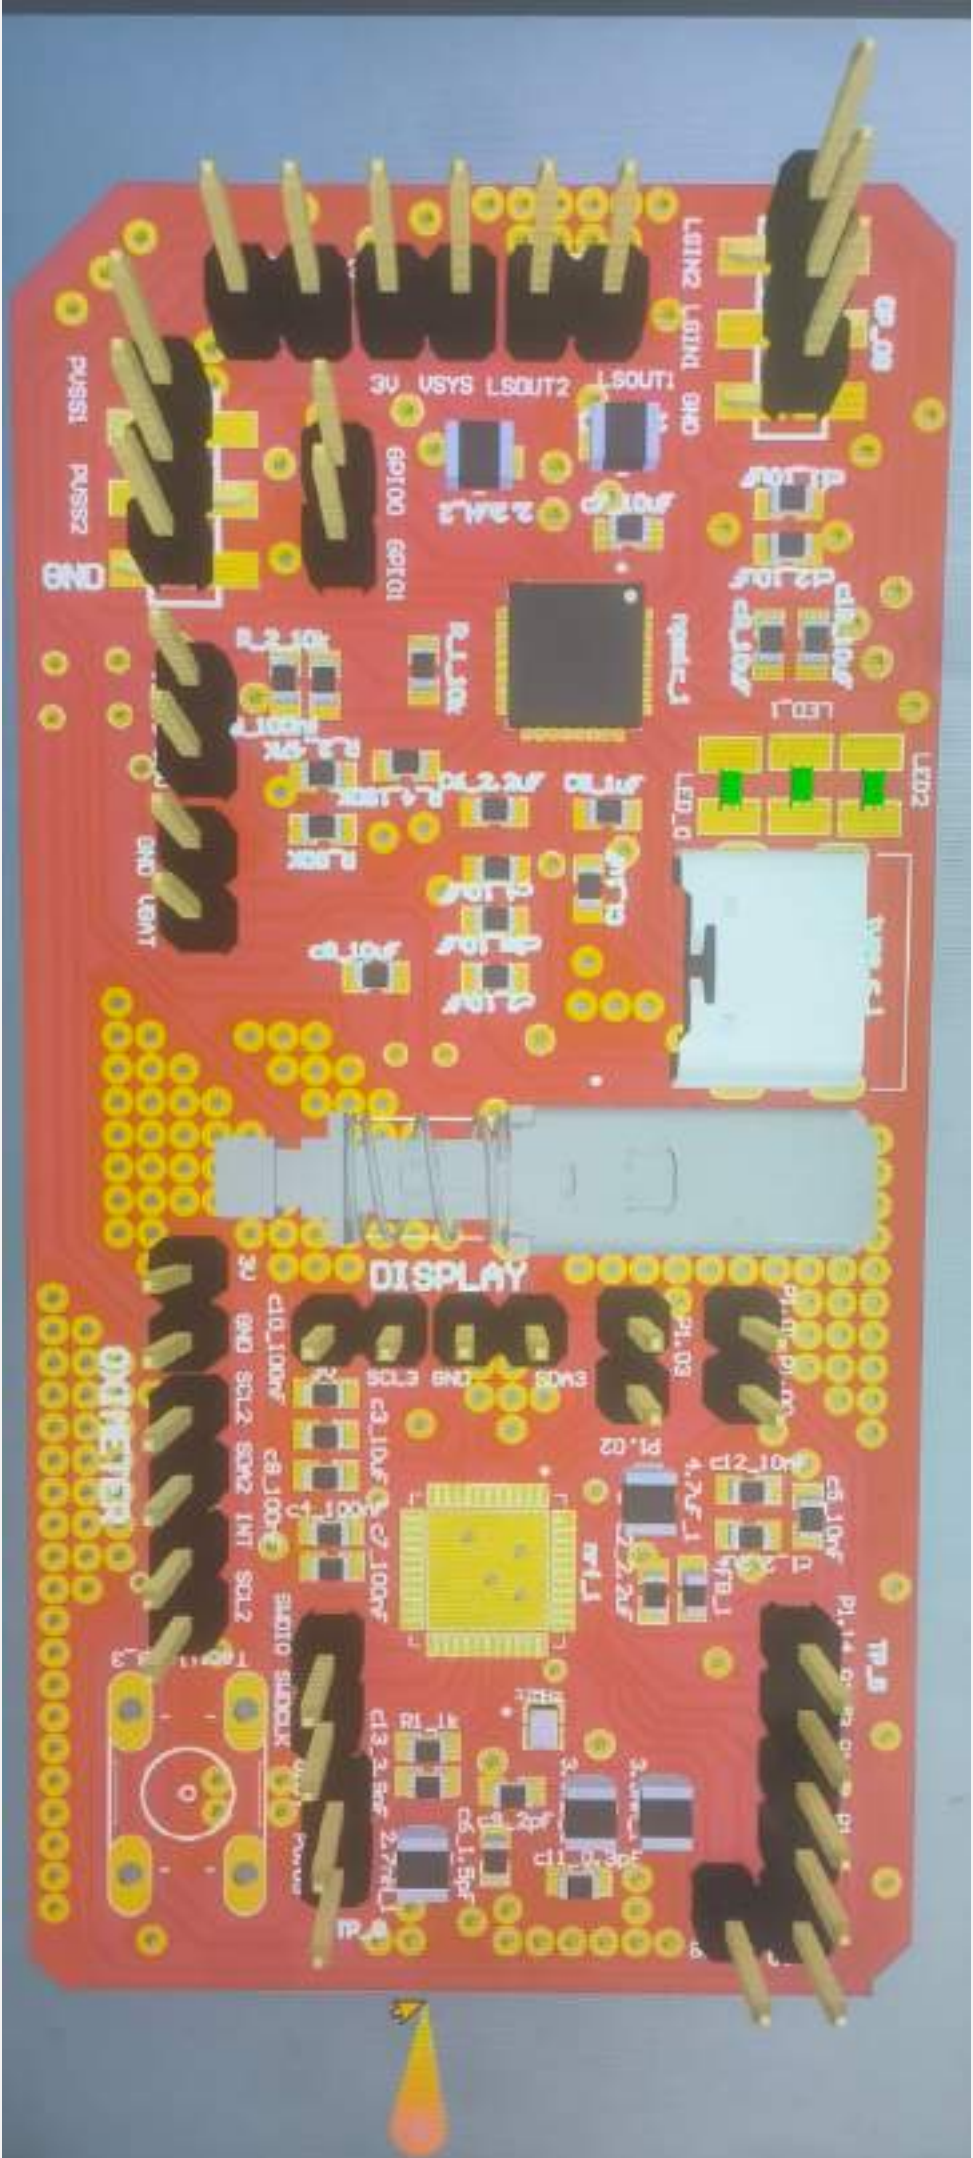

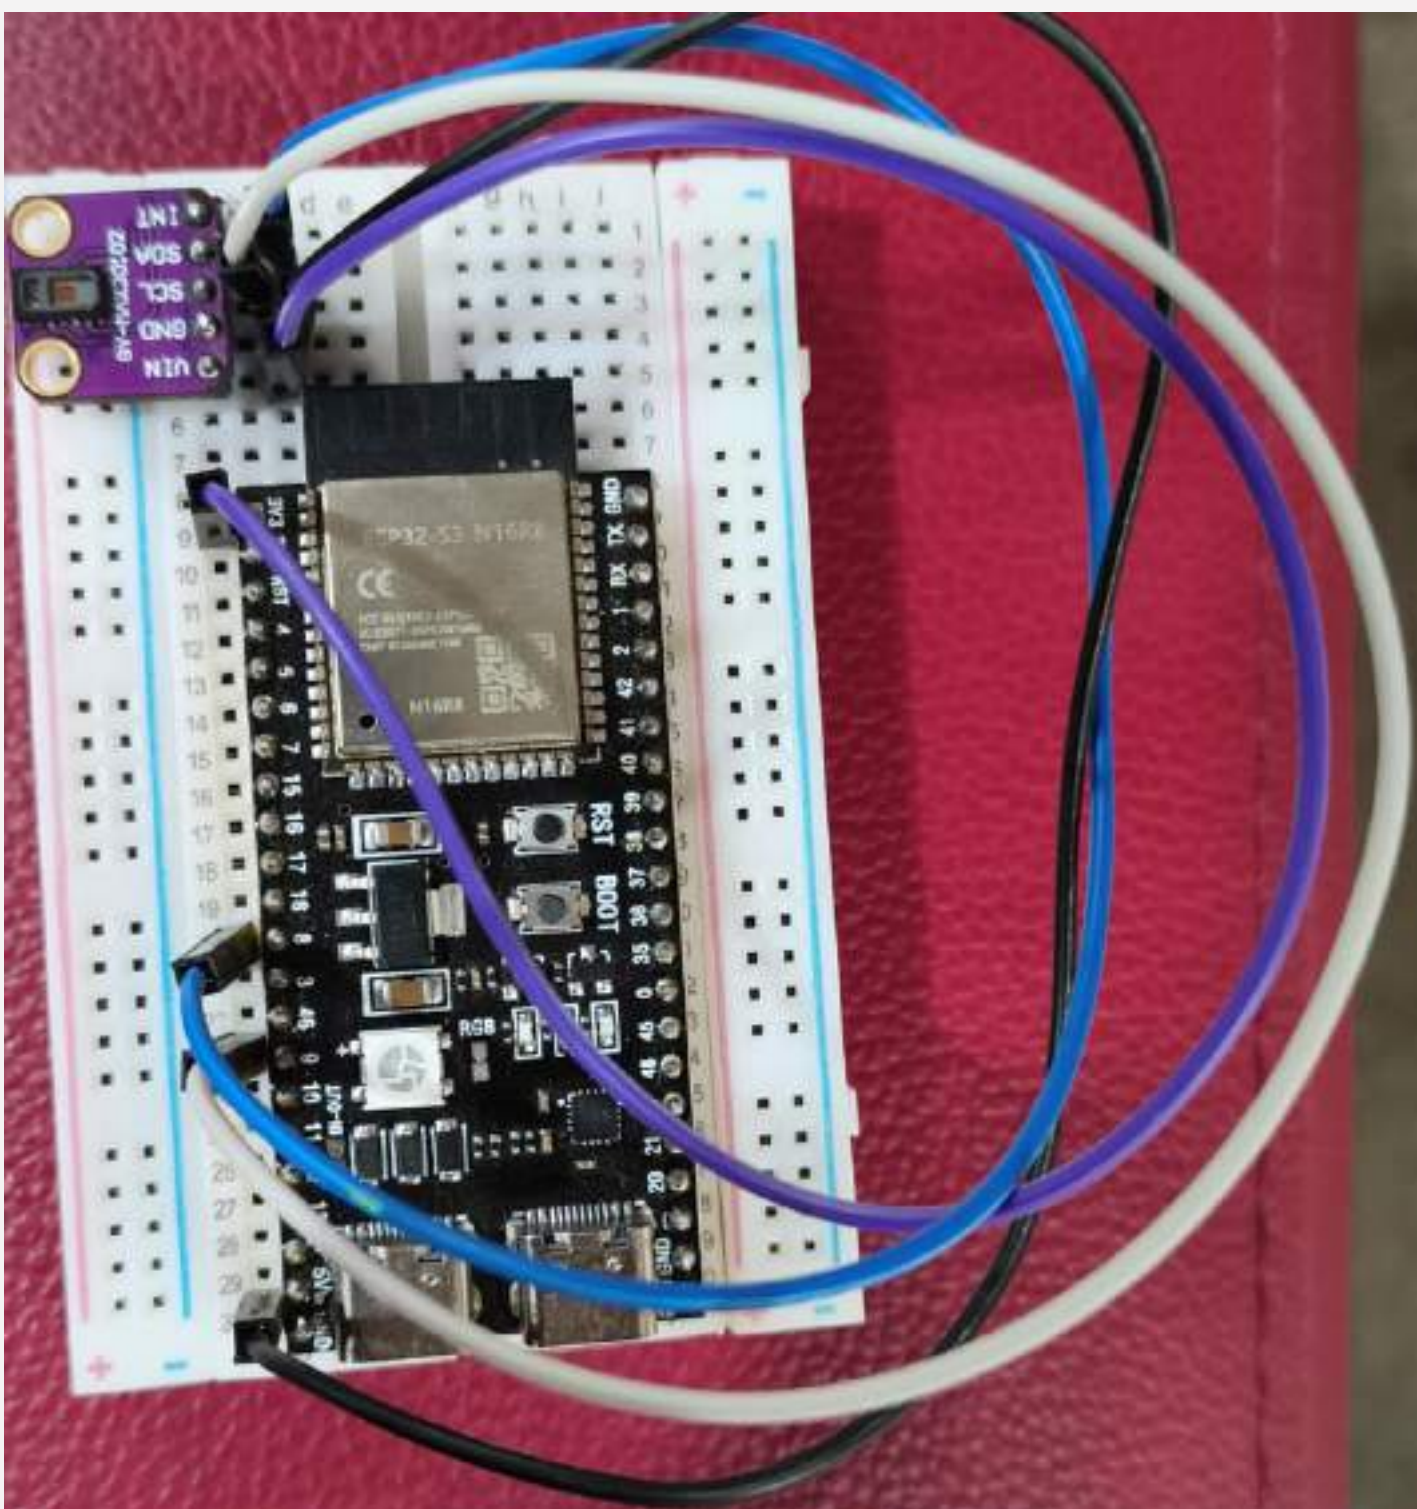

We have a working prototype that gives haemoglobin value in 20 seconds with 93% accuracy in comparison to gold standard

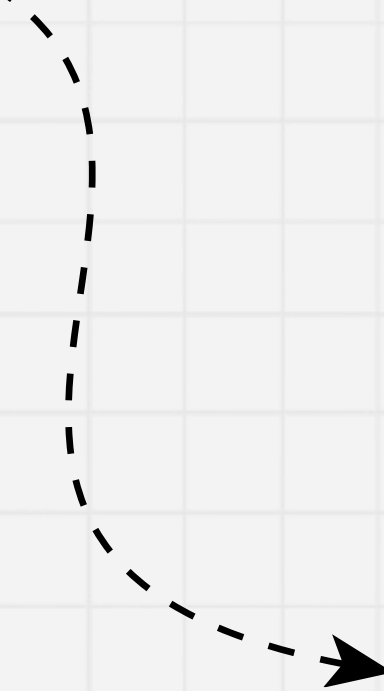

Validation

We have been to the JL Rahtogi Eye hospital and tested 15 patients, and the average accuracy was 85%

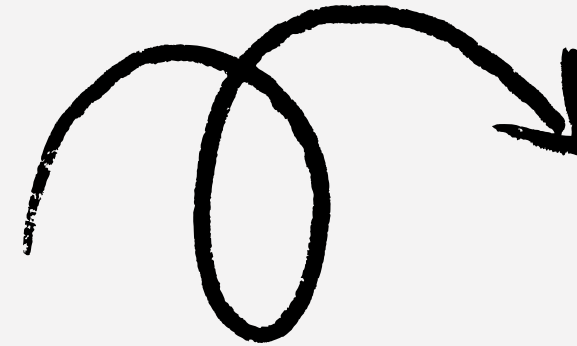

Milestone

Market sizing

TAM

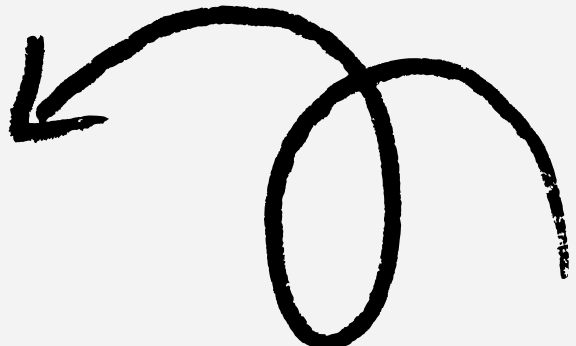

\$3.55B (2024)
→ \$6.1B
by 2033.

SAM

\$768M in 2024
→ \$3.05B by
2033 (16.5%
CAGR).

5% of \$3.05B ≈
\$150M / year

online ≈ 20% ×
\$150M ≈ \$30M
/ year

SOM

Conservative
(3%)

3% of \$30M =
\$0.9M / year

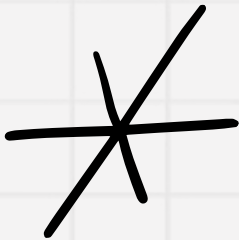

Aggressive
(10%)

10% of \$30M =
\$3M / year

source : Independent Landscape

*Assuming that the device runs for 5 years and does 1000 tests per month

GTM

out first 10 customers will be personal network of our mentors who are value conscious.

Next we will target government hospitals and primary care health centres as they need this device under anaemia mukt bharat programme.

The image features a hand-drawn graphic on a light gray grid background. At the center is a purple rectangular area with a torn, deckled top edge. Below the purple area is a smaller, solid yellow rectangular block, also with a torn bottom edge. The text "Thank you!" is written in a large, bold, black, rounded font across the purple area. Surrounding the central elements are several hand-drawn black ink decorations: three short, radiating lines in the top-left corner; a large, looping arrow in the top-right corner; a long, curved arrow pointing upwards from the bottom-left corner; and a six-pointed star in the bottom-right corner.

Thank you!

Market sizing

TAM

*40M
households
Top 5% → 2M

 $2M \times 3k = 600cr$

*40M = affluent ecommerce customers

SAM

$$2M \times 0.50 = 1M$$

15% of 1M $\approx$
150K people

$150k / 10 \text{ years} =$
15k
devices/year

15k
devices/year $\times$
3000rs = 4.5cr
per year

SOM
